Technical Skills

Frontend Technologies:

Html,css,
bootstrap,
javascript,
jquery,
Angular,
RestApi

RDBMS:

Oracle
MS SQL

software Tools:

vs code, jira software,

Reporting Tools:

Kredly,

Platform:

Windows XP, Windows 10,11, UNIX

AKSHAY KATHORE

SOFTWARE DEVELOPER

EDUCATION

Bachelor of computer applications, information Technology
2021

WORK EXPERIENCE

Overall, 3+ years of experience in functional and technical areas in IT solutions expertise in crafting visually appealing and highly functional web applications.

Proficient in modern web technologies including HTML, CSS, JavaScript, and Angular, complemented by a strong understanding of SQL for efficient database management.

Demonstrates a keen eye for detail in creating responsive and user-friendly interfaces, ensuring optimal performance across diverse devices and browsers.

Possesses a proven track record of collaborating effectively with cross-functional teams to deliver innovative solutions that align with business objectives and enhance user engagement.

1) Web developer

Company: MyrsaTech Solutions pvt ltd
13-MAR-2023 - Till date

Project: I) MENTOR MY BOARD (MMB) II) TOGGLEART SOFTWARE

Role: FRONTEND Developer

Responsibilities

Designed and developed responsive user interfaces using HTML, CSS, JavaScript, and Angular to ensure seamless user experiences across various devices and browsers.

Implemented interactive features and dynamic content to enhance user engagement and accessibility

Worked closely with UI/UX designers to translate design mockups into functional and visually appealing web pages.

Collaborated with backend developers to integrate APIs and ensure smooth data flow between frontend and backend systems

Optimized website performance by minimizing load times and improving page speed through efficient coding practices and asset management.

Conducted regular performance testing and debugging to ensure a high-quality user experience.

Ensured the website's compatibility with multiple devices by implementing responsive design principles, allowing for optimal viewing and interaction experiences..

Maintained high code quality by adhering to best practices in coding standards, version control, and documentation.

Conducted regular code reviews to ensure consistency and efficiency across the development team.

Gathered user feedback and analytics data to iterate on design and functionality, improving the overall user experience and satisfaction.

Implemented updates and new features based on client requirements and user feedback, ensuring the website remains current and user-centric

2) WEB DESIGNER

Company: SOFTONAUTS INFOTECH SOLUTIONS PVT LTD
13-NOV-2020 - 2021

Project: AMULYA GOLD WEBSITE

Role: WEB DESIGNER

Responsibilities

Developed the overall visual style and branding for the website, ensuring consistency with the company's identity and goals. Created engaging and aesthetically pleasing layouts that effectively communicated the brand's message and values.

Designed user interfaces that were intuitive, easy to navigate, and visually appealing, focusing on enhancing the user experience.

Utilized design tools such as Adobe XD, Figma, or Sketch to create wireframes, prototypes, and high-fidelity mockups

Ensured that the website design was responsive, adapting seamlessly to different screen sizes and devices, providing a consistent user experience on desktops, tablets, and smartphones.

Applied mobile-first design principles to prioritize essential content and functionality on smaller screens..

3) FRONTEND DEVELOPER

Company: SOFTONAUTS INFOTECH SOLUTIONS PVT LTD

2021 – 1 MAR 2023

Project: i) Offerking portal ii) Jmart Ecommerce website

Role: FRONTEND Developer

Responsibilities

Translated design mockups and wireframes into fully functional, pixel-perfect web pages using HTML, CSS, and JavaScript.

Ensured the consistency of design elements across the website by implementing reusable components and modular CSS.

Developed and maintained the frontend application using Angular, leveraging its features like components, services, and modules to create a scalable and maintainable codebase.

Integrated Angular with RESTful APIs to dynamically fetch and display data on the website.

Implemented responsive design techniques to ensure the website provided an optimal user experience across desktops, tablets, and mobile devices.

Used CSS media queries and frameworks like Bootstrap to handle different screen sizes and orientation

Optimized website performance by reducing load times, optimizing images, and implementing lazy loading techniques for faster user interactions.

Utilized tools like Lighthouse and Chrome DevTools to identify and resolve performance bottlenecks

Integrated third-party APIs and backend services to provide dynamic content and features, such as user authentication, data visualization, and form submissions.

Managed data fetching, state management, and error handling to ensure a seamless user experience.

Regularly updated the codebase with the latest frontend technologies and frameworks to keep the project modern and efficient.

Participated in sprint planning and retrospectives to continuously improve development processes and project outcomes.
